#### DETAILED ACTION

Page 2

### Claim Rejections - 35 USC \$ 112

The terms "elevated temperature or reduced pressure" in claim 3 are relative terms, which renders the claim indefinite. The term "elevated or reduced" are not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Accordingly, the claim is rejected for being indefinite.

## Claim Rejections - 35 USC \$ 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-2 and new claim 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reznik in view of the Japanese patent to Kawasaki of record for reasons of record.

The Reznik patent does disclose that the ceramic does absorb the hydrogen (see column 6, lines 42-48). The water flowing past the fluid releases the hydrogen on contact to activate the water (see column 6, lines 49-52).

Furthermore, the water flowing past the ceramic tube would produce a reduced pressure to release the hydrogen.

Accordingly, the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Reznik patent with the teachings of the Japanese reference, because the Japanese patent teaches that palladium is conventionally used in the art to provide hydrogen to activate water.

#### Response to Arguments

Applicant's arguments filed 1/14/04 have been fully considered but they are not persuasive. Applicants argue that the Japanese patent does not disclose the impregnation of the alloy with hydrogen before contacting with water.

The machine translation of the Japanese patent clearly renders the above argument untenable. The claim recites that the hydrogen gas sticks to the face of the material and is removed by vibration or electrical energy to react with the oxidants in the water (see claim).

Consequently, the claims stand rejected.

Application/Control Number: 10/030,420

Art Unit: 1753

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun S. Phasge whose telephone number is (571) 272-1345. The examiner can normally be reached on MONDAY-THURSDAY, 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam X Nguyen can be reached on (571) 272-1342. The fax
